UNMUTE AI: A MULTIMODAL SIGN-TO-VOICE AI AGENT

Communicate without barriers

Team PH1nix Ignite

THE PROBLEM

- **The Physical Barrier:** Real-time FSL and ASL Interpretations are expensive, rare, and slow, creating a “Participation Tax” for people with disabilities.
- **The Digital Barrier:** Current SLTs are “Non-Manual Signals Blind.” It ignores facial expressions and postures. Losing the “tone” of the conversations.

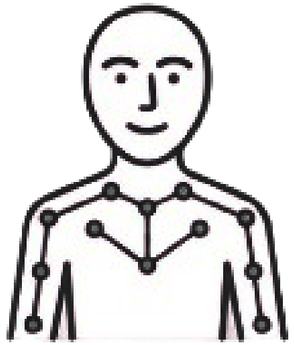
THE SOLUTION?

UnMute: The First NMS (Non-Manual Signals) and Context - Aware FSL and ASL Translator

Key Value Propositions

- **Expression - First:** Translates not just the hands, but also non-manual signals such as Face, Body, and Hands Simultaneously
- **Hardware - Free:** No gloves, no sensors. Just your camera.
- **Bridge to Understanding:** Moving from "Sign-to-Text" to "Human-to-Human."

FEATURES

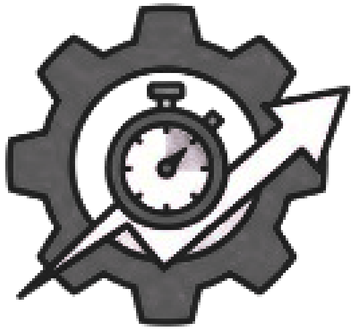


Landmark Tracking

Real-time skeletal and facial mapping

Live Overlay

A captioning bar that integrates with Digital Meetings.



Latency-Optimized Engine

Processing Conversations in Real-Time

Dialect Support

Tailored specifically for the nuances of FSL (Filipino Sign Language)

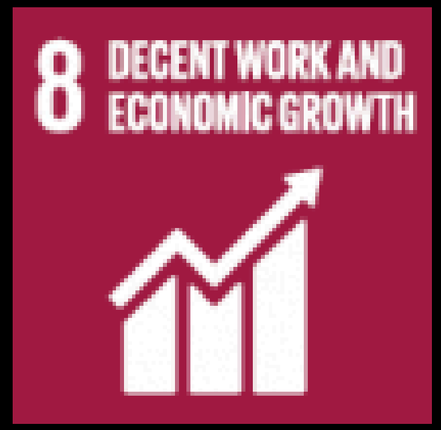
OUR EDGE

Feature	Legacy SLT Apps	Sensor Gloves	UnMute
Facial Grammar (NMS)	NO	NO	YES
Setup Cost	LOW	200$+	0$ (Software)
FSL Localized	NO	NO	YES
Real-time (<300ms)	NO	YES	YES

SOCIAL IMPACT

Empowering 100,000+ Filipinos to have an equal access to opportunities, especially people with disabilities.

Providing real-time classroom access without the "translation lag."



Mitigate the communication barriers that lead to 70% underemployment in the PWD sector.

Team PH1nix Ignite

Vision

To give everyone a seat — and a voice — at the table.
